

# Vision for Education and Wisdom

## Preamble

### Society's Core Objectives

*Recognizing the transformative power of knowledge in shaping societies, the Society is constituted with the primary objective of fostering intellectual, cultural, technological, and civic advancement across diverse domains.*

*Rooted in the ethos of inclusive education and social responsibility, the Society endeavors to promote excellence in literature, arts, science, and religious studies while contributing meaningfully to national development and global knowledge ecosystems*

*The Society affirms its resolve to cultivate a vibrant academic ecosystem that upholds scholarly excellence, preserves cultural heritage, advances civic values, and contributes to the upliftment of society through informed, empowered, and ethical individuals.*

1. The Society is committed to the **advancement of knowledge** through innovative and multidisciplinary education, aligning with the principles outlined in the National Education Policy (NEP) 2020. It supports cutting-edge research and curriculum development in emerging disciplines such as Artificial Intelligence, Data Science, Educational Technology, and Indian Knowledge Systems, while upholding the values of experiential and learner-centric pedagogy. By contributing to educational policy, designing skill-based courses, and promoting disciplinary excellence in fields including Humanities, Sciences, Commerce, Management, and Law, the Society acts as a catalyst for progressive and future-ready education.
2. Through its focus on **dissemination of knowledge**, the Society aims to enrich academic and professional communities via the organization of seminars, conferences, and workshops. It encourages peer-reviewed research publication and fosters strategic collaborations with educational institutions, industry, research bodies, and professional associations to ensure meaningful impact and the broad exchange of ideas.
3. With deep reverence for India's civilizational wealth, the Society upholds the **preservation of knowledge & heritage**, emphasizing the study and integration of Indic and Indian Knowledge Systems (IKS). Special attention is accorded to the traditional knowledge of Bengal and Eastern India, promoting cultural pride and intellectual continuity through documentation, curriculum integration, and scholarly engagement.

# Vision for Education and Wisdom

4. The Society is equally dedicated to fostering **civic literacy** and public consciousness, harnessing the power of Artificial Intelligence and digital innovation to enhance educational access, civic responsibility, environmental awareness, and ethical use of technology. It supports the development of learner-centric curricula enriched with life skills, entrepreneurial thinking, digital fluency, and climate literacy.
5. Guided by the principle of the **common good**, the Society actively engages educators, scholars, and institutions in building inclusive, equitable, and collaborative academic environments. It promotes faculty development, mentorship programs, and school-to-college transitions to empower both educators and students. Industry-academia linkages, experiential learning, and educational technology development are key pillars of its strategy for future-ready learning.
6. In pursuit of **social welfare**, the Society is committed to nurturing entrepreneurial capabilities among students and supporting innovation-led enterprises. It provides targeted support for learners from underprivileged and underdeveloped areas, thereby ensuring equity, opportunity, and inclusive growth.
